

Nikita Pletnev

Senior Software Developer

Expert developer with over 7 years of experience in leading web development projects, transforming ideas into high-performing, user-focused digital solutions. Proven track record of delivering scalable products that drive business growth and consistently exceed expectations. Experienced in integrating AI agents and LLM-powered workflows into modern applications, including automation of development tasks, intelligent data processing, and AI-assisted product features.

Work Experience

SENIOR SOFTWARE ENGINEER

Nokia

Jan 2025 - Jul 2025

Strengthened DevSecOps practices and optimised core software systems in a global telecom environment.

Key Responsibilities

- Strengthened DevSecOps practices, reducing deployment vulnerabilities by 25% through secure CI/CD pipeline automation (Jenkins, Gerrit CI) and certifications (AWS, Azure, Scrum Master)
- Improved software quality, reducing critical bugs by 20% and downtime by 30% through targeted optimisation of core modules, proactive debugging, and successful refactoring of legacy codebases
- Continuously enhanced technical skills, actively upgrading network management and DevSecOps competencies
- Designed modular frontend architecture enabling omnichannel delivery across multiple digital touchpoints
- Introduced AI-assisted development workflows and experimented with AI agents to automate debugging, documentation generation, and code analysis

Technologies

- AWS, Azure, Jenkins, Gerrit CI, Omnichannel Solutions

TEAM LEAD

Vurse

Jul 2022 - Jan 2025

Led a frontend team and launched multiple scalable projects with blockchain integrations.

SW DEVELOPMENT

EXPERIENCE: +7 years

Skill Set

Programming languages

- TypeScript
- JavaScript
- Python
- Solidity

Technologies

- React
- Redux
- Next.js
- Node.js
- GraphQL
- REST API
- Web3
- Blockchain
- AWS
- Azure
- Google Cloud
- Terraform
- Firebase
- Electron
- PostgreSQL
- MongoDB
- NoSQL
- Jest
- Cypress
- Selenium
- Mocha

Key Responsibilities

- Designed scalable web app architecture, boosting development efficiency by 35%.
- Launched 4 major web projects, improving delivery timelines by 20%.
- Integrated Web3 & blockchain features, raising user trust by 15%.
- Built CI/CD pipelines, reducing deployment time by 40%
- Recruited and onboarded 10+ developers, improving code quality by 25%
- Coached developers on frontend architecture, component design, performance optimization, and best practices
- Introduced headless CMS patterns and structured content modeling concepts similar to Contentful architecture
- Implemented AI-powered tooling and LLM agents to accelerate development workflows, improve code reviews, and assist with architectural decisions

Technologies

- React, TypeScript, Web3, Node.js, CI/CD, AWS, GCP, Blockchain, Contentful

SENIOR FRONTEND DEVELOPER

NLMK Group

Apr 2021 – Apr 2022

Revamped project modules, boosting productivity and performance.

Key Responsibilities

- Revamped project modules, boosting productivity by 30%.
- Built data visualizations with Echarts, improving interpretability by 50%
- Developed performance-focused UI with DevExpress, cutting processing time by 25%

Technologies

- Echarts, DevExpress, React, TypeScript

FRONTEND DEVELOPER

Latoken

Jan 2021 – Apr 2022

Key Responsibilities

- Contributed to high-load fintech platform improvements
- Integrated Bitcoin Diamond blockchain into backend, strengthening platform security

- Git
- Bitbucket
- Jira
- CI/CD
- Docker
- Kubernetes
- Contentful

Other

- DevOps & Cloud Architecture
- Machine Learning & AI APIs
- Data Visualization (Echarts, DevExpress)
- Omnichannel Solutions
- AI Agents
- LLM workflows
- AI-assisted development

Education

- Udemy – Advanced Fullstack Developer Course (2020)
- HBS Online – Financial Accounting (2023–2025)

Languages

- English (advanced)
- Finnish (basics)
- Russian (native)

Certifications & Self-Learning

- Microsoft Certified: Azure Fundamentals (2024)
- Google Professional Cloud Architect (2023)
- AWS Certified Solutions Architect – Associate (2022)
- Scrum Master (CSM) – Scrum Alliance (2022)

Personal Interests

- Blockchain & Web3 innovation
- AI-driven solutions
- Design Thinking

- Optimized high-load features, scaling platform to handle 2× peak traffic

Technologies

- Blockchain, Node.js, React, TypeScript

FRONTEND DEVELOPER

Shinservice

Dec 2019 – Jan 2021

Key Responsibilities

- Redesigned and optimized shinservice.ru UI
- Led full UI redesign, increasing engagement by 40%
- Built high-speed interactive modules, improving load times by 35%

Technologies

- React, JavaScript, CSS3, HTML5
